ABDIMAJID ALI MOALIM

Software Engineer | Full-Stack Developer | Data Analyst

Mogadishu, Somalia · +252 61 9534042 · majidalimoalim@gmail.com

linkedin.com/in/majidalimoalim · github.com/majid-ali-Moalim

PROFESSIONAL PROFILE

Accomplished Software Engineer and Data Analyst with a strong portfolio of production-grade systems deployed across healthcare, SaaS, and education sectors. Expert in designing scalable full-stack applications, real-time platforms, and business intelligence solutions using NestJS, React, PostgreSQL, and Power BI. Proven track record translating complex operational requirements into high-impact digital products. Committed to driving digital transformation in high-stakes environments.

FEATURED PROJECTS

AAMIN Ambulance Dispatch & Emergency System

NestJS TypeScript PostgreSQL Prisma ORM React WebSockets

End-to-end ambulance dispatch platform for Somalia's leading EMS provider — covering the full incident lifecycle.

- Architected scalable NestJS backend with RBAC for Dispatchers, Drivers, Nurses, and Admins
- Built real-time dispatcher dashboard with WebSocket-powered mission & crew tracking
- Designed analytics dashboards delivering KPIs, incident trends, and response time metrics
- Implemented manual location tracking and centralized communication center

DalaalConnect – Property & Vehicle SaaS Marketplace

Node.js JavaScript MySQL

Multi-tenant SaaS marketplace with verified property/vehicle listings and identity verification.

- Developed RESTful API backend and normalized MySQL schema for scalable listing management
- Built user verification & trust mechanisms with mobile-responsive UI and advanced search

Higaad Platform – Educational Management System

React Node.js MySQL

Full-stack platform streamlining academic workflows, student records, and performance reporting.

- Built Node.js/MySQL backend reducing manual overhead through automated reporting modules
- Designed React frontend with multi-role access for students, instructors, and admins

Student Progress Tracker App

React Node.js MySQL REST API

Digital monitoring platform for schools — real-time academic, attendance & behavioral tracking.

- Built multi-role system (Parents, Teachers, Admins) with JWT auth and role-based access control
- Designed parent dashboard with real-time alerts, attendance summaries, and teacher messaging

Hospital Appointment Data Analysis

Python Pandas NumPy Power BI SQL Excel

Comprehensive analysis of hospital appointment data uncovering patient behavior and operational insights.

- Cleaned and transformed raw data using Pandas & NumPy, resolving missing values and outliers
- Built interactive Power BI dashboards: appointment volumes, wait times, cancellation KPIs
- Delivered statistical analysis identifying peak demand periods to optimize scheduling

Baadi App – Smart Utility & Search Platform

JavaScript Node.js

Local search and utility platform improving information accessibility for Somali users.

- Optimized mobile responsiveness and load performance for low-bandwidth environments

CORE COMPETENCIES

- Full-Stack Development
- Backend Engineering
- API Design & Integration
- Database Architecture
- Real-Time Systems
- Data Analysis & Visualization
- Business Intelligence
- System Design
- Agile Delivery
- RBAC & Security
